## About Me

I am a highly skilled and motivated software engineer with 2 years of professional experience in Full Stack Development. My expertise lies in developing responsive web applications, designing and implementing APIs, integrating multiple systems, and optimizing application performance.

## Experience

### Nustac Oct 2022

Front End Developer

Develop and maintain web applications using HTML, CSS, and JavaScript, ensuring high-quality code and user experience. Collaborate with back-end developers and UX/UI designers to ensure seamless integration of front-end and back-end functionalities

### Total School Solution Sept 2022

Technical Development Specialist

Manage and maintain Total School Solution Company's WordPress website, ensuring timely updates and optimal performance. Work closely with the marketing and content teams to ensure the website content is up-to-date and aligned with business objectives

### Becon Tutors August 2022

Front End Developer

At Becon Tutors, we developed a Customer Relationship Management (CRM) system using Next JS, a popular open-source framework for building modern web applications. Our CRM is designed to help us manage our interactions with clients and track their progress

### Orbit ED April 2022

Back End Developer

Developed Backend For VR Application in Django and Had experience in Dev Ops of Hosting this application on AWS
